## SYGPZ High-pressure Water Distribution Device

井口装置 KY65-25

### 产品结构特点

本井口装置主要由套管法兰、锥座式油管头、上法兰、闸阀、节流器小四通等主要部件组成，用于陆上采油，注水和油井作业时的井口控制装备。

### Structure characteristics

This wellhead device mainly consists of casing flange, cone-seat tubing head, upper flange, gate valve and throttle motor. It is applicable to the wellhead control devices served for onshore oil recovery, fieldflooding and oil well operation.
